

All sporting groups need their own space and **ACG COMMERCIAL** are excited to have worked with various organisations to deliver their sports clubhouses, leisure centres and multi-sports complexes, canteens, show grounds, aquatic centres and splash parks, sport amenities and change rooms, playing courts both indoor and outdoor, sports lighting, and sporting fields.

Just like active sports people, **ACG COMMERCIAL** generate their own energy and deliver a winning product every time.

We have helped a range of organisations to meet their community needs and to enhance and expand their services. These include Community centres, Surf Life Saving Clubs, Heritage Buildings, Childcare Centres, Church Buildings, Sports Clubs, Art Galleries and Community Halls.

ACG COMMERCIAL are proud of the outcome of these works. For example after we resolved the disability access to a 60 year old church a person in a wheelchair attended a wedding on the very next day; upon completion of church conference facilities the centre was immediately booked solid for the next two years; by attenuating the noisy roof of a community centre it allowed use by a local concert band. We truly operate to our motto Architecture About people...

Works across more than 50 schools, include child care centres, primary schools, secondary schools, and special schools.

Projects have included a diverse range of facilities and spaces including covered outdoor areas, amphitheatres, science laboratories, home economics kitchens, reception areas, library fitouts, classroom fitouts, sports halls, performance areas, walkways, playgrounds, shelter and sail covers, and carparks.

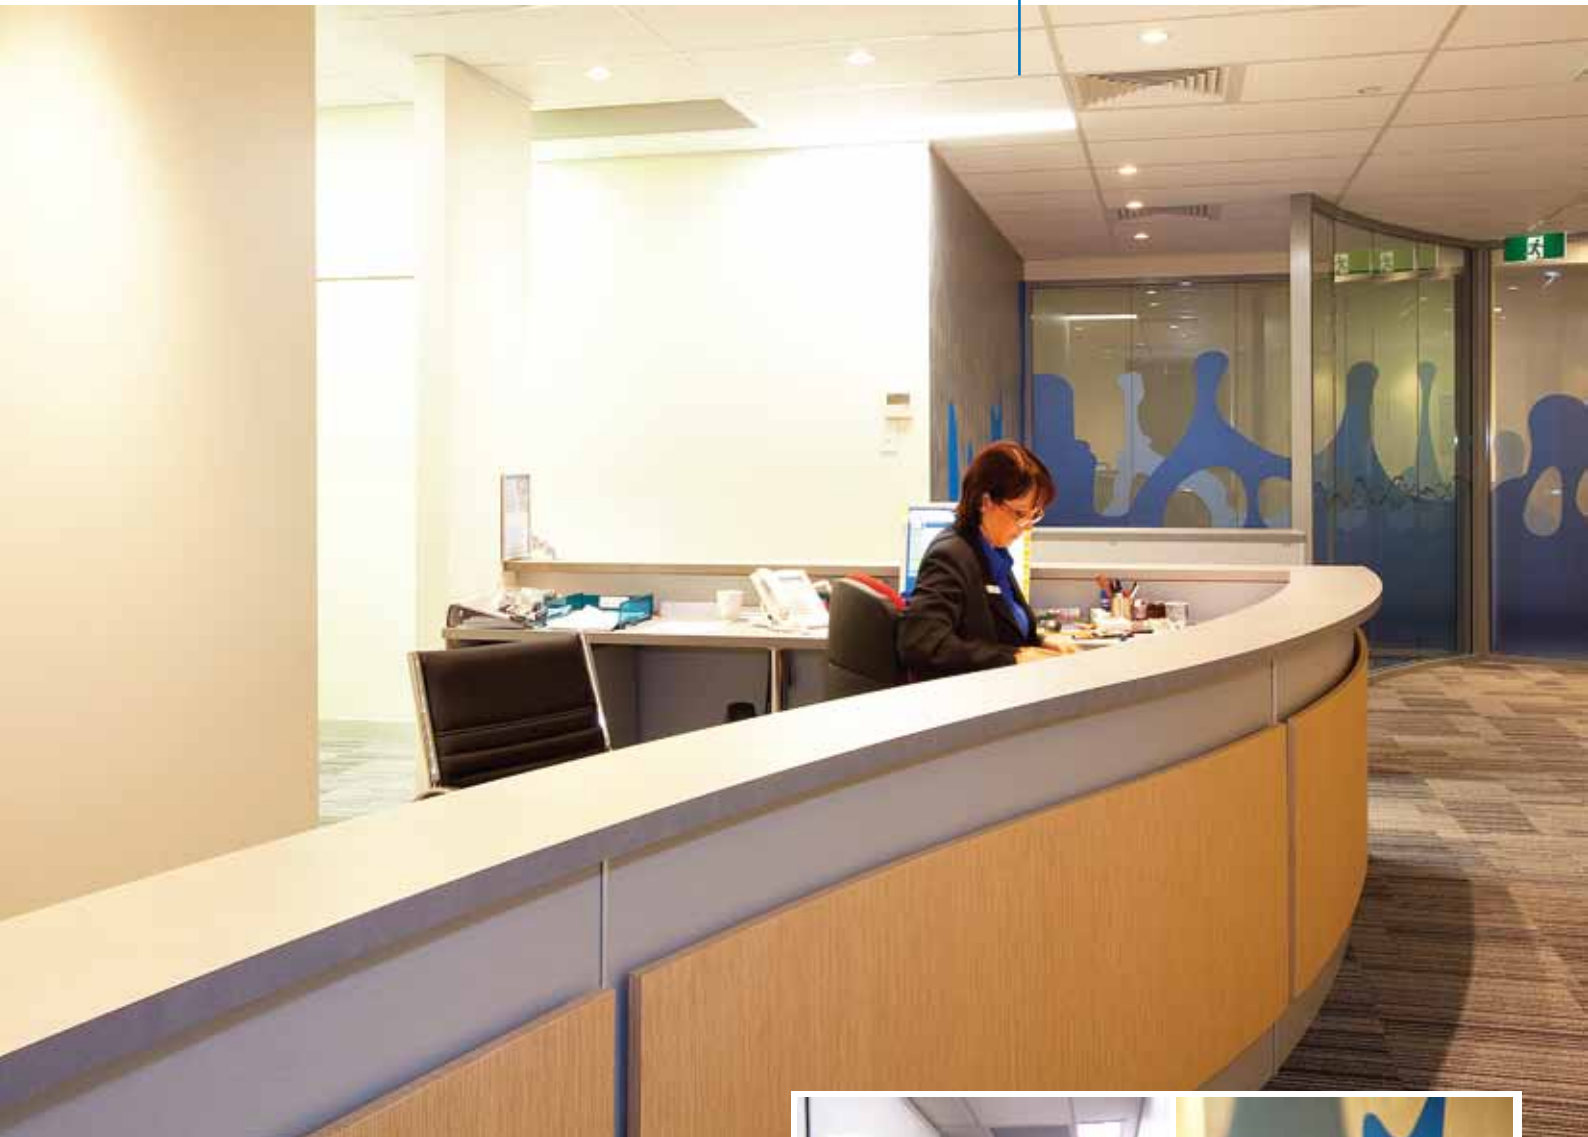

ACG COMMERCIAL have also delivered specialist facilities in Australian Universities.

Queensland Councils appreciate our work because we value-add to public projects.

ACG COMMERCIAL have successfully delivered more than 100 Council capital works projects.

We carefully scope projects for maximum community benefit, often personalising buildings to their location and community, and combining hard wearing good value facilities with local features or artworks. These projects have included public amenities, administration buildings, service depots, art galleries, community halls, security systems, sports facilities and sporting clubs, and local heritage buildings.

Being quality rated as 'Industry Best Practice' helps ensure that **ACG COMMERCIAL** meets the specialist needs of the medical profession. This includes specialist doctors surgeries, acoustic laboratories and allied health clinics.

We are familiar with the particular requirements of the medical fraternities and offer a contemporary and clinical approach to these spaces.

ACG COMMERCIAL will make sure your facilities reflect the high standard of professional services which you provide.

We have a proud tradition of upholding the values and importance of our built heritage through restoration, refurbishment, and enhancement.

This has included a lighthouse now operating as a tourist attraction, country halls where neighbours still dance, factories which are now art galleries, Cobb and Co coach stops which replace horses with buses, and specialist archival buildings, to name a few.

ACG COMMERCIAL have demonstrated a level of subtle intervention which enhances facilities with well researched project works and a familiarity with the approval processes and desires of the community.

Your office is the face of your business so ensure that it projects the right message.

ACG COMMERCIAL have experience with new offices, office refurbishments and office fitouts for a variety of business types including solicitors, specialist doctors, financial planners, architects, school receptions, Council offices and general leased areas. We ensure minimum construction times and turnkey projects. We have experience not only with decor, fitout and workstations but also with security systems and telecommunications networks.

Your business staff may spend a considerable portion of their working time in your office so let's make it work for you.
